

Senatobia Municipal School District Instructional Management Procedure

As a requirement of the Mississippi Public School Accountability Standards, 2015 (MPSAS), each school district must implement an instructional management system (IMS) unless the district meets the highest levels of performance. This guidance is intended to aid districts in the development maintenance of an IMS, described below.

The school district implements an instructional management system that has been adopted by the school board and includes, at a minimum, the competencies and objectives required in the curriculum frameworks approved by the State Board of Education that are available to all teachers in each school. (Districts Meeting the Highest Levels of Performance are exempted.)

1. The Senatobia Municipal School District will post on its website each year the updated "Mississippi Department of Education Current Frameworks/Standards Listing."
2. The Senatobia Municipal School District Board of Trustees will adopt the Instructional Management Plan.
3. In a professional development setting, the district will provide teachers training on how to access the current Listing, along with best practices for instruction and assessment.
4. Teachers will be given hard copies of the current Listing if requested and will be able to demonstrate availability of documents upon a classroom visit.
5. Each teacher will sign the Instructional Management Plan Verification document indicating that they have received training on the current Listing.
6. Documentation of training on the current Listing will be housed at the district office.
7. Updated changes to the current Listing will be provided to teachers throughout the school year as needed.

Senatobia Municipal School District Instructional Management Plan

I have received a copy of the Frameworks/Standards that I teach for the 2018-19 school year which has been approved by the Senatobia Municipal School District Board of Trustees. I have accessed these Frameworks/Standards via the Senatobia Municipal School District web page under Curriculum.

I have available to me a hard copy of these Frameworks/Standards, and house these in my classroom. I understand that as these Frameworks/Standards change, updated changes will be provided to me.

Instructional Management System Requirements and Evidence

Requirement	Evidence
Instructional management system	<ul style="list-style-type: none">• District-developed document must include all current frameworks and standards.• Districts often include an introduction providing guidance on best practices for instruction and assessment, as well as a listing of tools and resources available to teachers within the district.• Districts should have this document available at central office.
Local board adoption	<ul style="list-style-type: none">• Board minutes must reflect approval of instructional management system
Available to all teachers	<ul style="list-style-type: none">• Current frameworks and content standards must be available within classrooms at each school (consistency across content areas and grade levels).

Districts need to determine how to ensure that frameworks and standards remain current and available from year to year to prevent teachers from using previous versions of these documents. Examples of this process are provided below.

- o Updated CD-ROMs distributed annually
- o Updated hard copies distributed annually o Updated USB drives distributed annually
- o Online access to frameworks and standards *

* NOTE: Teachers must be able to demonstrate availability of documents upon a classroom visit. The MDE does not recommend online access as the only means of distribution due to potential problems with hardware or Internet connectivity.
