Goals* of the Dropout Prevention Plan for SMSD

1. Decrease chronic absenteeism by 15% over the next five years (SY2023-2024).
2. Decrease K-5 retentions by 25% over the next five years (SY2023-2024).
3. Increase graduation rate by 10% over the next five years (SY2023-2024).

*These goals will be monitored and reviewed on a yearly basis by analysis of data. Revisions will be made as needed based on what the data from the graduation rate, chronic absenteeism rate, and retention rate of K-5 reveal.

15 Effective Strategies

The National Dropout Prevention Center has identified 15 Effective Strategies that have the most impact on dropout prevention.

1. Systemic Renewal
2. School-Community Collaboration
3. Safe Learning Environments
4. Family Engagement
5. Early Childhood Education
6. Early Literacy Development
7. Mentoring/Tutoring
8. Service-Learning
9. Alternative Schooling
10. After-School Opportunities
11. Professional Development
12. Active Learning
13. Educational Technology
14. Individualized Instruction
15. Career and Technical Education (CTE)

The 15 Effective Strategies are defined as following:

1. Systemic Renewal—Systemic renewal calls for a continuing process of evaluating goals and objectives related to school policies, practices, programs, and organizational structures as they impact a diverse group of learners.
2. School-Community Collaboration— When all groups in a community provide collective support to the school, a strong infrastructure of partnerships sustains a caring environment where youth can thrive and achieve.
3. Safe Learning Environments—A comprehensive violence prevention plan, including conflict resolution, must deal with potential violence as well as crisis management. A safe learning environment provides daily experiences, at all grade levels, that enhance positive social attitudes and effective interpersonal skills in all students in all classrooms.
4. Family Engagement—Research consistently finds that family engagement has a direct, positive effect on children’s achievement and is one of the most accurate predictors of a student’s success in school.
5. Early Childhood Education—Birth-to-five interventions demonstrate that providing a child additional enrichment can enhance brain development. Also, the most effective way to reduce the number of children who will ultimately drop out is to provide the best possible classroom instruction from the beginning of their school experience through the primary grades.

6. Early Literacy Development—Early literacy interventions to help low-achieving students improve their reading and writing skills establish the necessary foundation for effective learning in all subjects.
7. Mentoring/Tutoring—Mentoring is a one-to one caring, supportive relationship between a mentor and a mentee that is based on trust. Mentoring offers a significant support structure for high-risk students. Tutoring, also a one-to-one activity, focuses on academics and is an effective practice when addressing specific needs such as reading, writing, or math competencies.
8. Service-Learning—Service-learning connects meaningful community service experiences with academic learning. This teaching/learning method promotes personal and social growth, career development, and civic responsibility and can be a powerful vehicle for effective school reform at all grade levels.
9. Alternative Schooling—Alternative schooling provides potential dropouts a variety of options that can lead to graduation, with programs paying special attention to the student’s individual social needs, workforce skills, and academic requirements for a high school diploma.
10. After-School Opportunities—Many schools provide after-school and summer enhancement programs that eliminate information loss and inspire interest in a variety of areas. Such experiences are especially important for students at risk of school failure because they fill the afternoon “gap time” with constructive and engaging activities.
11. Professional Development—Teachers and counselors who work with youth at high risk of academic failure need to feel supported and have an avenue by which they can continue to develop skills, techniques, and learn about innovative strategies.
12. Active Learning—Differentiated learning embraces teaching and learning strategies that engage and involve students in the learning process. Students find new and creative ways to solve problems, achieve success, and become lifelong learners when educators show them that there are different ways to learn.
13. Educational Technology—Technology offers some of the best opportunities for delivering instruction to engage students in authentic learning, addressing multiple intelligences, and adapting to students’ learning styles. Online learning and credit recovery options are key approaches to use.
14. Individualized Instruction—Each student has unique interests and past learning experiences. An individualized instructional plan for each student allows for flexibility in teaching methods and motivational strategies to consider these individual differences.
15. Career and Technical Education (CTE)— A quality CTE program and a related career guidance program are essential for all students. School-to-work programs recognize that

youth need specific skills to prepare them for the increased demands of today's workplace.
